Objective

To obtain a challenging internship/full time position in the field of web design/programing, advertising and/or the gaming industry.

Experience

Berglund Center for Internet Studies - Lead Web Designer - Jan '08 to May '08

My work at the Berglund Center involved the maintenance and redesigning of all their web-sites and bringing them up to current web standards while developing a new look and feel to the sites that would still allow access to their entire library of past submissions. This re-design included the main site as well an many secondary sites relating to the center.

Wild Zoo - Store Website - Dec '10 to Jun '11 - wildzoo.com

The Wild Zoo site is an advance e-commerce site that uses an xml database to store the name and descriptions of products which is used to create the pages and sites main menu. The site also uses a JQuery based navigation and slideshow system for greater compatibility across browsers.

Adam and Alexandra's Wedding - Wedding Website - Aug '10 to Nov '10

adamandalexandraswedding.com

This website was designed to coincide with the theme of the couples wedding while providing all necessary information to the user with only one click. The site features animated buttons, a JQuery slideshow and an advance guestbook with an admin control panel. The site was also created to work on all modern smartphones.

Any-O-Meter - Website for iPhone app - June '09 - www.any-o-meter.com/

The Any-O-Meter website was made to advertise and display the application to the public who were using either a mobile device or a desktop computer. The site also features an integrated gallery.

Education

Pacific University of Oregon; Forest Grove, Oregon - August 2003 - August 2008

Bachelors of Arts - Media Arts and Integrated Media with concentration in Computer Science and Video Production.
